SUKDANAN'S STANDARDIZED TEST MATERIALS IN SCIENCE

1. The field is hereby informed of the available region-led validated test materials for Science from Grade 3 (Sinugbuanong Binisaya and Sinurigaonon) to Senior High School. The said test materials include the Milestone-based Calendars, table of specifications, high-quality summative tests, and answer keys.
2. The said test materials shall be utilized by all public and private schools implementing regular and special curricular programs (Regional Science High School, Legislated Science High Schools, Special Science Elementary Schools, and Science, Technology and Engineering Program implementers) from SY 2021-2022 to SY 2022-2023.
3. The test materials are offshoot of the region-led project "Sukdanan" which adopted the international and national designs and standards for assessment development. Its reliability was tested by an external and on-going study using the Spearman-Brown Prophecy Formula with predicted reliability of 0.96 (highly-reliable) using the split-half reliability method.
4. Schools may utilize the high-quality test materials in either "direct adoption" or "adaption". "Direct adoption" means that the developed test materials are directly used by the teachers in their summative test administration with no modification, and identity markings of the region are retained or preserved. "Adaptation" means that the high-quality questions are used as test banks by the schools and/or divisions for repacking and contextualization.
5. The 744 validated test materials are available at:
